Air Flow Sensor Cleaner

Ref. 3259

12x400ml

USE

Bardahl Air Flow Sensor Cleaner is a professional product elaborated to clean and degrease any type of airflow sensor or other kind of electronic contact, in all types of application fields such as portable electronics, automotive, motorbikes, motorized cultivators, water-sport equipment, agricultural machinery, ...

PHYSICAL & CHEMICAL PROPERTIES

Physical state	Liquid
Colour	Colourless
Boiling point	48 °C
Flash point	-17 °C
Flammability	Extremely inflammable
Relative density	0,695

PROPERTIES

Bardahl Air Flow Sensor Cleaner has the following properties:

- Dissolves and eliminates greases, dusts and dirt on the air flow sensor
- Restores the function of the airflow sensor and eliminates bad readings
- Repels water and moisture
- Does not leave any greasy film and dries quickly
- Eliminates oxidation
- Is safe for platinum metals in the airflow sensor
- Is safe to use on paints, rubber, plastics,...
- Is not toxic

INSTRUCTIONS FOR USE

Disconnect sensor or other appliances before using the product.

Spray product directly on the surfaces to be treated.

Use the power of the spray to eliminate deposits and clean the sensor thoroughly.

Let the product soak in for a couple of minutes and repeat operation.

Let it dry for at least 10 minutes before reconnection.

Never dry with compressed air and do not touch the sensor wire with your fingers.
