# Injector cleaner

Ref. 1185

12x300ml

## USE

BARDAHL Diesel injector cleaner has been developed for cleaning the injection system of light vehicles, trucks, heavy duty and agricultural equipment.

## PHYSICAL & CHEMICAL PROPERTIES

Colour	Yellow
Physical state	Liquid
Flash point	28°C
Relative density	0,865-0,875 g/ml
Kinematic viscosity	< 20,5 mm <sup>2</sup> /s (40°C)

## PROPERTIES

BARDAHL Diesel injector cleaner has the following properties:

- Cleans and lubricates the intake valves and the injectors,
- Restores injector spraying,
- Facilitates cold starting,
- Protects the fuel system against rust and corrosion,
- Extends the lifespan of the injection system.

## INSTRUCTIONS FOR USE

Pour contents of the can into fuel tank.

For an optimum cleaning, pour contents of the can into 20L of fuel. Drive until full consumption and refuel.

Suitable for all diesel engines, low or high pressure, turbocharged or not, equipped or not with a catalytic converter and a particle filter.
