Bardahl Racing Oil Booster

Ref. 13103

12x300ml

USE

Bardahl Racing Oil Booster contains a unique formula made of FULLERENE molecules, that protects and covers with an unbreakable, anti-friction and pressure-resistant film all turbo and engine metal parts.

PROPERTIES

Bardahl Racing Oil Booster:

- Lubricates and protects turbo and engine when cold starting and when driving under extreme conditions.
- Lubricates and protects turbo and engine when the oil level is too low.
- Protects turbo and engine against oil oxidation.
- Thickens the oil film at high temperature without changing the oil quality and viscosity.
- The biggest problem in racing engines being friction, this additive will reduce the friction in the engine by up to 70% (depending on the engine tolerances).

INSTRUCTIONS FOR USE

Pour the complete bottle into warm engine oil.

1 bottle treats up to 6 liter of oil.

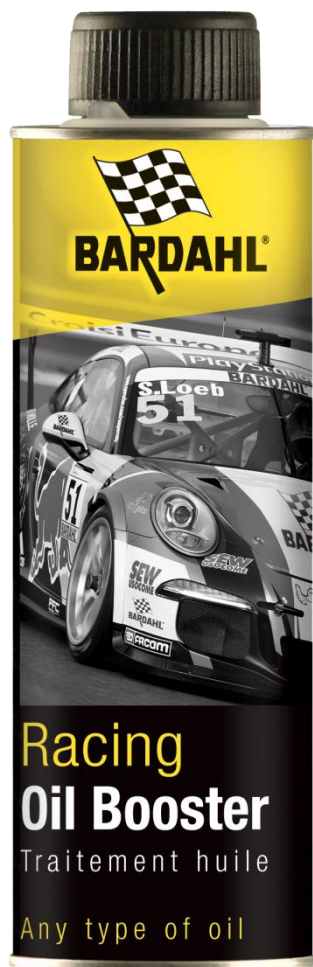

Compatible with any engine oil.

This additive is free of graphite, PTFE, chlorinated paraffin, ceramics.

PHYSICAL & CHEMICAL PROPERTIES

Physical state	Liquid
Colour	Colourless
Flash point	> 60 °C
Density	0,801 g/m³
Viscosity, kinematic	< 20,5 mm²/s (40°C)

V08/2019
