Radiator Cleaner

Ref. 1096B

12x500ml

USE

BARDAHL Radiator Cleaner allows a complete degreasing and descaling of the cooling circuit eliminating all deposits in it. It is miscible in any type of antifreeze and coolant (type C, type D and universal). It is used in all petrol, diesel and LPG engines, 2 or 4 strokes. It is also compatible with any type of radiator (aluminum and plastic).

PROPERTIES

BARDAHL Radiator Cleaner has the following properties:

- Eliminates all harmful deposits such as rust, scale, mud.
- Resists the pressure and high temperatures of modern engines (high-pressure direct injection).
- Prevents overheating of the engine.
- Is safe for hoses, seals and all other components of heat engines.

INSTRUCTIONS FOR USE

Shake the bottle vigorously and add the contents to your cooling system.

Drive for ten minutes or let the engine run at idle speed.

Drain and rinse with clear water.

Fill with coolant according to the recommendations of the manufacturer and protect the engine by using the BARDAHL RADIATOR STOP LEAK.

1 bottle treats up to 10 liters of coolant.
