Cetane booster

Ref. 2305

12x500ml

USE

Bardahl Cetane Booster has been especially designed to improve the original properties of some low cetane rate fuels.

Compatible with any type of diesel engine, catalytic converter and DPF.

PROPERTIES

Bardahl Cetane Booster :

- Increases cetane rate by up to 5 points
- Improves combustion and prevents engine deposits
- Increases engine power and performance
- Eliminates pinking and poor detonation
- Makes cold starting easier

INSTRUCTIONS FOR USE

Pour content into tank each time you fill up.

One can treats 50L of diesel.

PHYSICAL & CHEMICAL PROPERTIES

Physical state	Liquid
Odour	Hydrocarbons
Relative density	0.800-0.810
Flash point	> 61°C
Auto-ignition point	> 200°C
