Diesel treatment

Ref. 1071B

12x300ml

USE

BARDAHL Diesel treatment is a preventive product that can be used during the whole engine life.

Its use is recommended to avoid the loss of power due to engine clogging and wear. Suitable for any type of Diesel engine.

Compatible with catalytic converters and DPF.

PROPERTIES

Thanks to its properties, BARDAHL Diesel treatment is effective to:

- Lubricate upper part of cylinders, rings,...
- Protect valves and prevents valve seat from wear,
- Stop knocking and backfiring,
- Limit fuel overconsumption,
- Protect the injectors and the pump,
- Reduce exhaust smoke.

INSTRUCTIONS FOR USE

Pour contents of the can into the tank before refueling.
